PRESS RELEASE

Refuse/Recycling Tip of the Week from the Vernon Department of Public Works:

Corrugated cardboard is a large portion of the total recyclables collected with weekly curbside service. For proper disposal, cardboard should be cut/folded into **3 ft x 3 ft** bundles and tied with string/twine to a maximum height of 12 inches.

Boxboard (cereal and dry food boxes with inside bag removed) is also recyclable and can either be bundled or placed with newspapers in a paper bag and placed in or next to the recycling bin for pickup.

It is important to remember that **untied** cardboard and boxboard placed for pickup can be difficult to load and tends to blow around the streets under windy conditions.

Thank you for your recycling efforts and participating in Vernon's recycling program.
